CAPABILITIES STATEMENT

ABOUT WIDESCOPE

Widescope Consulting Contracting and Services delivers information technology and staff augmentation services to the federal government, state and local municipalities. We bring to bare fast, reliable, immediately productive, and experienced resources from multiple disciplines to reduce risk and ensure customer satisfaction. Utilizing customer focused demand management processes, we continuously prepare and develop talent tailored towards your specific needs.

We constantly strive to be a company that delivers an outstanding work product without requiring a lot of maintenance from our government clients. Our ultimate goal is to surpass your expectations and make your job easier, not more difficult.

CORE COMPETENCIES

Widescope Consulting Contracting and Services helps customers meet their technology objectives by providing technical resources to meet their short and long term IT requirements related to the following:

-  Staff Augmentation
-  Project Management
-  Program Management
-  Software Development
-  Executive Administration

PAST PERFORMANCE

- Submarine Fiber Optics Mapping & Cabling
- Cyber Security & Visitor Management Solutions
- Facility Management & Security Modernization
- Dynamic Dashboards for Data Mining & Analytics
- Software & Website Development/Maintenance
- IT, Communications, & Internet Connectivity
- Advanced Training & Curriculum Development
- Modern Video Teleconferencing (VTC) Installations

FEATURED CLIENTS

- Space and Naval Warfare Systems Command (SPAWAR)
- US Defense Information Systems Agency (DISA)
- The Christian Methodist Episcopal Church
- Naval Computer and Telecommunication Station (NCTS)

CODES & CERTIFICATIONS

- Service Disabled Veteran Owned Small Business
- Center for Verification Evaluation (CVE) Certified
- Minority Owned Small Business
- 8(a) Business Development Program
- DOT certified DBE
- CAGE Code – 743B9
- We Accept Credit & Purchase Cards

NAICS CODES: 541330, 5141512, 541611, 541612
 541614, 561320, 541519, 611430

Underwater Secure Connectivity Submarine Fiber Optics Cabling (SFOC) & Mapping

There are approximately 448 submarine cables in service around the world, and that number is constantly changing as new cables enter service and older cable are decommissioned. We deliver secure connectivity for today's submarines and their use of fiber-optic technology.

Secure Submarine Cabling & Connectivity

We specialize in:

- Advanced cable mapping to ensure optimal cable routes and security
- Architecting multiple cable lines to support reliable connectivity
- Guaranteed fast speeds carrying up to 160 tbps and beyond
- Increased lit (transmission) and potential (end-delivery) capacities
- Engineered with minimum design life of 25 years
- Consistency of data transference at far less cost than satellites

Protection of Critical Infrastructure Pathways: Military Manhole Security

The United States has the most robust and complex network of underground critical infrastructure pathways in the world. The challenge is: How do you optimize security at these access points, while mitigating risk? We address underground vulnerabilities by providing 24/7/365 intrusion detection, with real-time monitoring, and comprehensive alerts and reporting.

Our state-of-the-art manhole Intrusion Detection System (IDS) protects against:

- 1 Unauthorized Access
- 2 Copper Theft
- 3 Vandalism in Real-Time

For optimal security, we utilize:

- **Powerless Fiber Optic Sensors**
Monitor manholes, handholes and communication junction sites with efficiency and reliability
- **Secure Hardware Controllers**
Oversee thousands of pinpointed sensors at once from one centralized system
- **Advanced Reporting & Integration**
Receive case management reports and detailed maps of every manhole with seamless integration into your existing dispatching system

Custom Application Development & Deployment: **Secure Visitor Management System**

Our Visitor Management System is a secure user-friendly application designed for quick monitored access to single or multi-site facilities. It's simple to use, and encrypted for optimal security.

System Features Include:

- Functions on PC and Mac systems/tablets
- Utilize tablet camera to take picture of Visitor
- Signature captured when a visitor checks in
- Print badges with visitor picture and name
- Visitor search and history log of user logins
- Data update/modification log
- Dual-user permissions groups (admin and basic user accounts)
- Allows Administrator approval prior to new user account setup
- Captcha™ math problem on login pages for increased security
- Full feature Administrator Login with user management, use logs, and panel settings
- Clean user friendly interface that is fully customizable to your brand and colors
- Email notification when visitor signs in
- Export Visitors to Excel (CSV File)
- Import/export feature for employee contacts
- Advanced encryption for added security

Comprehensive Video Teleconferencing (VTC) Tools Setup and Support

Widescope Consulting and Contracting Services is proud to offer advanced video teleconferencing (VTC) tools that range from new and small room arrangements to multi-location installations. We specialize in delivering end-to-end VTC solutions that feature high quality equipment and cyber secure interconnectivity.

VTC Installation & Setup Includes:

- Preparation of system functional interconnection diagrams, circuit details, and system functional "as-built" drawings
- Drafting of facility and equipment location drawings
- Assembling and mounting equipment and wiring interconnects within racks
- Testing all components for proper operation and fabrication of custom wall plates and/or custom electronic devices, etc.

Field Labor & Project Management:

- Logistical oversight of equipment procurement, staging and onsite delivery
- Development of project schedule and oversight of the contractor teams
- Installing structural systems for multimedia equipment where needed, including in millwork, walls, floors and ceilings
- Full-cycle system level testing, de-bugging, site clean-up and rubbish disposal
- Attendance at construction/coordination meetings with the client's technical representatives and construction team
- End-user training on systems operation
